## Community Care Plan, 'the health plan with a heart'

### What is high blood pressure?

- ♥ According to the American Heart Association, High blood pressure (hypertension) is when your blood pressure is consistently too high
- ♥ Blood Pressure is the force of your blood pushing against the walls of your blood vessels
- ♥ Blood pressure usually gets higher or lower during the day, but can cause health problems if it stays too high for a long time
- ♥ Having high blood pressure that is not controlled can lead to heart disease and stroke
- ♥ Heart disease and stroke are the leading causes of death in the United States

### How do I keep my Heart Healthy?

1. **Visit your doctor**
  - Your doctor can measure your blood pressure
  - Your doctor can tell you how to prevent or control your number
2. **Eat Healthy**
  - Eat frozen and fresh fruits and veggies
  - Eat low-fat dairy
  - Eat less saturated and total fat
3. **Decrease Salt Use**
  - Do not add salt to foods
  - Eat foods that contain less sodium (salt)
4. **Stay Active**
  - Exercise for at least 90 minutes a week
5. **Limit Drinking**
  - Drink only 1-2 drinks a day
6. **Track your blood pressure at home**
  - Your doctor can help you find a Blood Pressure tracker that is right for you
7. **Take medicine**
  - Take your medicine exactly how your doctor tells you to
  - Even if you are feeling ok, it is important to keep taking your medicine

Por favor, contacte a nuestro departamento de servicio al cliente al 1-866-899-4828 TTY/TDD 1-855-655-5303 de Lunes a Viernes desde las 8:00 a.m. a 7:00 p.m.*

# CCP Pregnancy Corner

## Preeclampsia

Preeclampsia is high blood pressure and protein in urine that occurs after 20 weeks of pregnancy.

### **Who is at risk?**

- First-time moms
- Women who had preeclampsia before
- Women who have sister(s) or mother that had preeclampsia
- Women younger than 20 or older than 40
- Women who had high blood pressure or kidney disease before pregnancy
- Women who are obese or have a BMI of 30 or more

### **How do I prevent preeclampsia?**

1. Do not add salt to your meals
2. Drink 6-8 glasses of water a day
3. Rest
4. Exercise
5. Elevate your feet many times a day
6. Do not drink Alcohol
7. Do not drink caffeinated drinks like soda
8. Take your medicines and/ or supplements
